Differences between XHTML and HTML
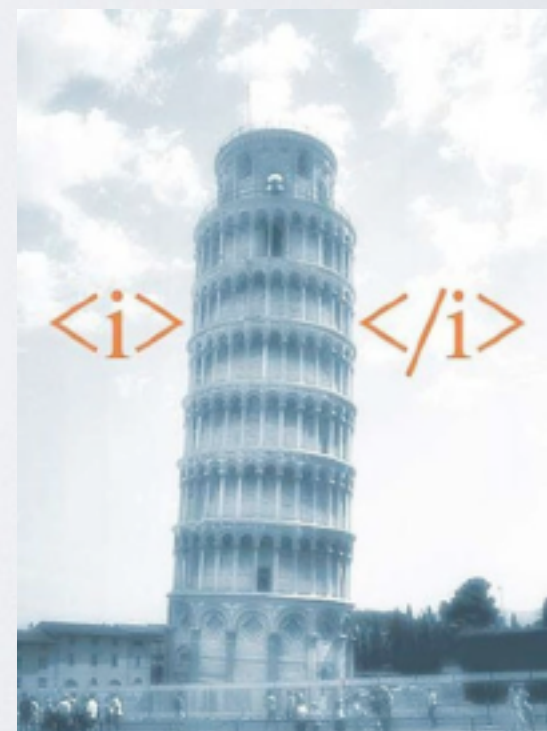

The styling disappeared in HTML 4 to become CSS

➡ Elements related to styling became <u>deprecated</u>

```
<center> <b> <i> <br> <font> <frameset> <frame> ...
```

Controversies among web developers

To use or not to use `tables`

http://programmers.stackexchange.com/questions/277778/why-are-people-making-tables-with-divs
