Attributes (key/values pairs) in the opening tag

```
<!DOCTYPE html>
<html>
 <head>
  <meta charset="utf-8"/>
  <title>My first page</title>
 </head>
 <body>
  <!-- It's a joke -->
  <h1 class="header">CSCC09</h1>
    <p>Check the
     <a href="https://thierrysans.me/CSCC09/">Website</a>
    </p>
 </body>
</html>
```

Selection of tags

<h1> <h2> <h3>   headers (<h1> is the biggest by convention)

<p>   delimitates a paragraph

<img>   image

<a>   specifies an anchor (typically an hyperlink)

<ul>   unordered list

<li>   list item

<div>   delimitates a block

<span>   group in-line document (use mainly for style)
